Skills

- **Python**
- **React JS**
- **Html,CSS,Java Script**
- **C**
- **Express JS,Node JS**
- **Mongo DB**

Language

- **English**
- **Tamil**

Projects

- **MultiFacet AI**

Developed a versatile platform integrating chatbot, text generation, and code conversion functionalities. Leveraged the MERN stack for a resilient backend infrastructure, complemented by robust user authentication mechanisms. Provided users with seamless access to AI-driven features, fostering personalized experiences in a secure environment.

- **Tasty Trails Food Delivery App**

Developed Tasty Trails, a user-friendly food delivery application, using React and Tailwind CSS. Designed intuitive interfaces for browsing menus, placing orders, and tracking deliveries. Integrated real-time order status updates and secure payment gateways for enhanced user experience. Resulted in a seamless platform connecting users with their favorite culinary delights for convenient delivery.

- **Book Store Project**

Developed a book store CRUD application using the MERN stack. Leveraged MongoDB, Express.js, React.js, and Node.js for full-stack functionality. Implemented features for browsing, adding, editing, and removing books. Demonstrated proficiency in creating scalable web apps with user authentication.

- **Portfolio**

Designed and built a personal portfolio website using React.js to showcase professional skills, projects, and experiences. Created a responsive and visually appealing layout with components for project galleries, resume download, and contact information.

Achievements

- Won First prize in Paper presentation competition for the paper titled **"Connecting Human brain and Computer"**
